

# CRAVEHOME IS LOOKING FOR NODEJS BACKEND DEVELOPPER

CraveHome is an online homemade food ordering and delivery platform that connects users with local home cooks.

To apply for this opportunity, please send your resume to [aya@cravehome.co](mailto:aya@cravehome.co)

## What you will do:

- Design and develop reusable code for data services
- Maintain & support API
- Integrate user-facing (React) UI elements developed with server-side logic
- Manage the interchange of data between the server & the users
- Develop all server-side logic, definition and maintenance of the central database; ensure high performance and responsiveness to requests from the front-end
- Integrate front-end elements built by your co-workers into the application
- Create database schemas that represent and support business processes
- Implement automated testing platforms and unit tests
- Work with modern tools including Jira, Slack, GitHub

## Requirements:

- 2+ years of professional experience working with NodeJS server side & querying data with Transact-SQL
- 4+ years of professional software development experience
- Basic understanding of front-end technologies is necessary as well as knowledge of Node.js core & frameworks Express, StrongLoop, koa, hapi etc.
- Good understanding of server-side templating languages
- Good understanding of server-side CSS preprocessors
- Ability to create and maintain continuous integration and delivery
- Understanding differences between multiple delivery platforms, such as mobile vs. desktop
- Ability to effectively communicate via written and spoken English
